## Mathematics Master Class: Mrs Rusholme reports:

Thirty two girls from Lower School signed up for to the Mathematics Master Class on the Platonic Solids held on Tuesday evening. The girls were able to answer all the questions posed by the presentation from the Royal Institution. The presentation led them through self discovery of the solids and how they are formed. The girls made the solids using Zome construction kits. Then the session moved on to the fun challenge of making bananas, flowers and pumpkin shapes from the Zome kits and dipping them in bubble mix to allow fantastic bubbles to appear inside the shapes.

The girls enjoyed the Master Class and each took home a model of their own design and a booklet on Platonic Solids.

PRIORSFIELD SIXTH

## Sixth Form Boarding: Miss Picken reports:

Half term now seems a distant memory for all. The girls have returned and once again hit the ground running. For the U6th these are crucial weeks running up to Easter and for the L6th, Prefect applications and Parents' Evening have been the talk of the town. A number of girls have enjoyed 18th birthdays recently so there have been various celebrations.

Next week we are looking forward to our second 'Round the World' lecture hosted by the 6th Form girls themselves.

## News from Junior Boarding: Mrs Roberts-Barter reports:

On Tuesday, the boarders enjoyed a fabulous dinner to celebrate Chinese New Year. Many thanks go to our amazing catering team who, once again, showed us what 5 star service we get!

This weekend we are looking forward to an afternoon at Guildford Spectrum for a choice of swimming or bowling and then a shopping trip to Westfield shopping centre. Roll on the warmer weather, when we can take advantage of some more scenic weekend trips!
